MEMORANDUM FOR : Chief, Technical Services & Support Group

SUBJECT : Questions Concerning [] Model B Light Table

25X1

1. The [] Model B Light Table was built by []
It has an excellent film drive system and is partially responsive to DED's
development objectives. It will be directly competitive with the [] 918
Light Table developed for us under contract, putting us in much the same
position with the 918 Light Tables as we currently occupy on the 1540's
made by []

25X1

2. It is difficult to anticipate the present impact, since, we
currently have on file a memo from IEG stating that they are not interested
in the procurement of 918 Light Tables. It is their current intention to
use 1540's and 940's for all of their work. We are not sure that they
will maintain this position if we were to suddenly receive a great influx
of material from tactical acquisition systems; but for now, there is
apparently no operational requirement. However, we may receive interest
from the intelligence community in the terms of joint procurement. We are
investigating this situation now.
